Optimizing the delivery times information	3

Automatic deletion of orders

In compliance with the GDPR, all orders will now be anonymized after 2 years and completely deleted from the system after 5 years.

Automatic removal of shopping car items

As of release 6.3.1, the shopping cart will also be regularly cleaned up. During login you will be notified if there are items in your shopping cart which were added more than 15 days ago. Items that are not ordered within 30 days after being added to the shopping cart will be automatically removed.

Please note that this cleanup will be carried out even though you might not log in during that 30-day-period.

Optimizing the delivery times information

From now on delivery times for items that are not hub-capable will not be displayed anymore.

A part is defined as “not hub-capable” if one of the following characteristics apply:

Characteristics	Values
Width	> 1,5 m
Theft-relevant part	Yes
Hazardous material label	Yes
Weight	> 50 kg
Height	> 1,5 m
Length	> 1,5 m

Note:

A part without base data cannot be checked for hub-capability. It is therefore assumed that it is hub-capable.

The check for hub-capability in addition to the availability status is taken into account for the calculation of delivery times.

The screenshot shows a shopping cart interface with a table of items and a summary section. The table has columns for 'Teilenummer', 'Benennung', 'RG', 'Preisangabe (EUR)', 'Menge', and 'Summe (EUR)'. The first item is 'A 000 982 33 08 26' with the name 'BORDNETZBATT.' and a quantity of 30. A warning icon is next to the name. Below the name, it says 'Ersetzt: A 000 982 33 08'. The price is 'LP/Nettopreis' and the sum is '220,00'. The quantity field shows '1' with minus, plus, and delete buttons. A green checkmark icon is next to the quantity field. A red box highlights a warning message: 'Voraussichtliches Lieferdatum: Lieferung nur auf Anfrage.' Below the table, there is a button that says '> Alle Teile aus dieser Gruppe bestellen'.
