

XENTRY WIS

Quick Guide

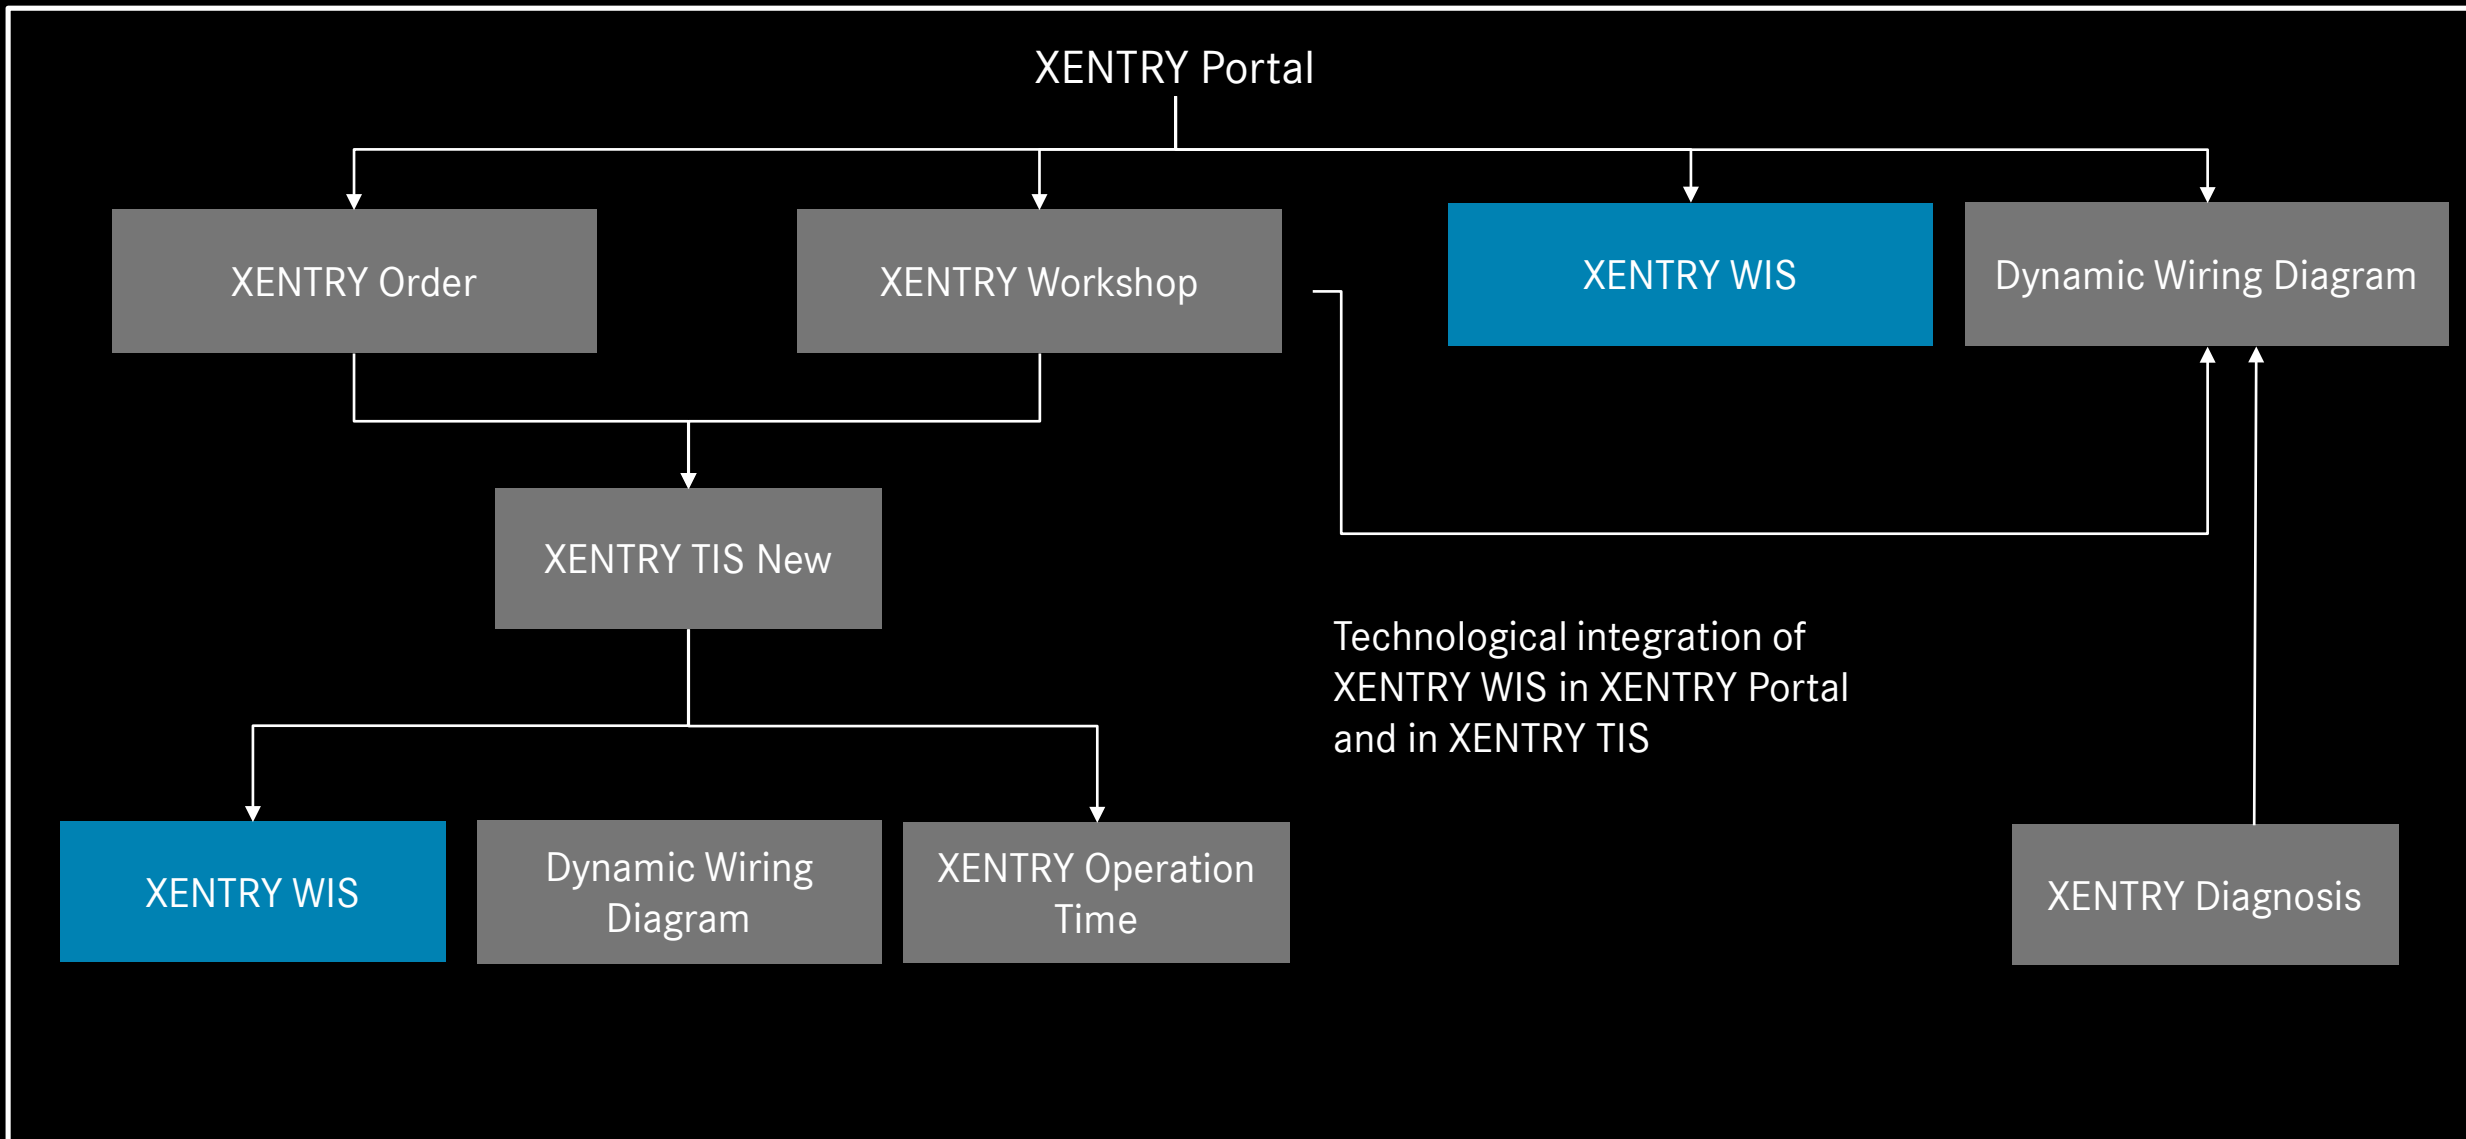

Product Management XENTRY WIS, GSP/ORE, June 2021

Mercedes-Benz
Das Beste oder nichts.

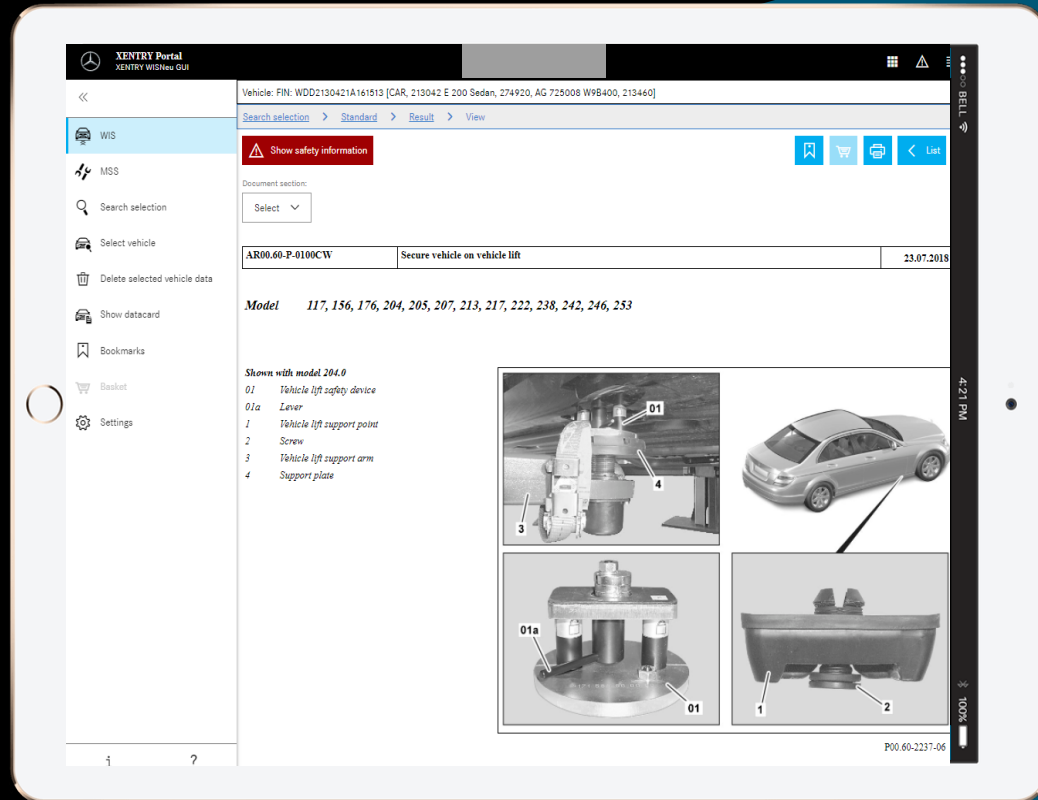

Overview XENTRY WIS

Overview XENTRY WIS

Overview XENTRY WIS

New product design

JAVA/OVS Client no longer necessary

Technologically "state-of-the-art"

XENTRY Portal integrated

Faster information search

Mobile device-capable

Quick familiarization through continuation of the WIS operating concept

UseCase XENTRY WIS

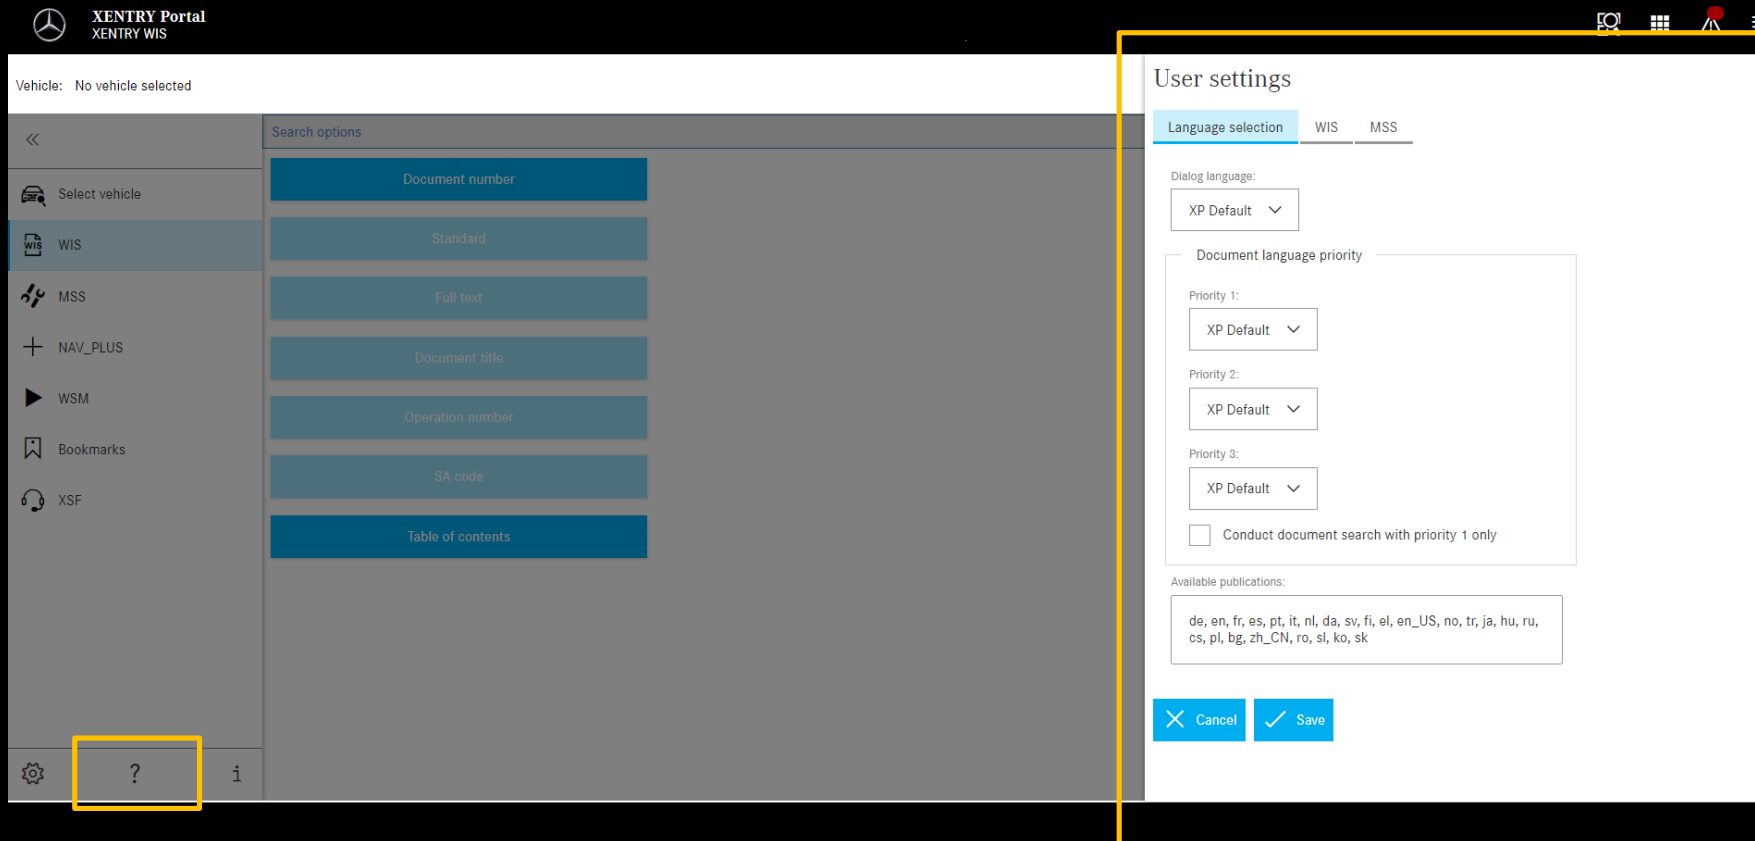

UseCase XENTRY WIS

The screenshot shows the XENTRY WIS interface with several annotated components:

- Vehicle identification:** A yellow box highlights the top header area containing the Mercedes-Benz logo, 'XENTRY Portal', 'XENTRY WIS', and a 'Vehicle: No vehicle selected' status.
- Panel:** A yellow arrow points to the 'Search options' bar located below the vehicle identification area.
- Function selection:** A yellow box highlights the left-hand navigation menu, which includes options like 'Select vehicle', 'WIS', 'MSS', 'NAV_PLUS', 'WSM', 'Bookmarks', and 'XSF'.
- Display area:** A large yellow box encompasses the main content area, which displays a list of search options: 'Document number', 'Standard', 'Full text', 'Document title', 'Operation number', 'SA code', and 'Table of contents'.
- XENTRY Features:** A yellow box highlights the top right corner of the interface, containing icons for search, grid view, a warning triangle, and a menu.

UseCase XENTRY WIS

User and language settings

When XENTRY WIS is called up for the first time, the interface and document language is preset to the language that each user has set in his overarching user profile (= default).

Every user can set the interface and document language(s) in XENTRY WIS as desired. The settings are saved.

UseCase XENTRY WIS

The screenshot displays the XENTRY WIS interface. On the left, a sidebar contains navigation options: 'Select vehicle', 'WIS', 'MSS', 'NAV_PLUS', 'WSM', 'Bookmarks', and 'XSF'. The main area shows a search options table with columns for 'Document number', 'Standard', 'Full', 'Document', 'Operation', 'SA', and 'Table of c'. A modal dialog is open in the center, titled 'Vehicle identification number:'. It features a dropdown menu set to 'WDB', an input field, a search icon, and a trash icon. Below this, there are sections for 'Mode:' with a 'Chassis mode' dropdown, and 'Vehicle type:' with a 'Select vehicle type' dropdown. At the bottom of the dialog are 'OK' and 'Cancel' buttons. Three yellow arrows point to the 'Select vehicle' option in the sidebar, the 'WDB' dropdown in the dialog, and the 'OK' button in the dialog.

1. Select vehicle

2. Enter and confirm the vehicle identification number

3. Confirm selection

Vehicle identification with a vehicle identification number (VIN) precisely defines the complete vehicle data.

With the integrated jump-out from XENTRY TIS, among others, the vehicle identification number is automatically taken over

UseCase XENTRY WIS

Show data card

The screenshot shows the XENTRY WIS interface. At the top, the Mercedes-Benz logo and 'XENTRY Portal XENTRY WIS' are visible. The vehicle information is 'Vehicle: FIN: WDD21328 Mercedes-AMG E 63 S 4MATIC+ Wagon, 177980, *****'. A search options menu is open, listing various search criteria like 'Document number', 'Standard', 'Full text', etc. The 'WIS' option is selected. On the right, a 'Datocard WDD21328' is displayed, showing a list of vehicle specifications and SA codes.

Specification	Value
Engine no.	177980 60 121714
Sales des.	Mercedes-AMG E 63 S 4MATIC+ Wagon
Order number	0959403024

UseCase XENTRY WIS

The screenshot displays the XENTRY Portal interface for a Mercedes-AMG E 63 S 4MATIC+ Wagon. The left sidebar contains navigation options: Select vehicle, WIS (highlighted), MSS, NAV_PLUS, WSM, Bookmarks, and XSF. The main area shows a list of repair tasks with columns for document title, model information, and action buttons (info, bookmark, eye). A 'Safety information' dialog box is overlaid on the list, containing the following text:

Safety information

The following safety information documents are associated with the document:

1. Risk of death caused by vehicle slipping or toppling off of the lifting platform.

Have you read the safety information documents or should they be displayed?

I have read this document Display

Warnings may be available for a WIS document. In this case, when the document is called, a window with a hazard warning is displayed. In addition, the hazard warning document can be displayed again at any time by the left side button in the document.

UseCase XENTRY WIS

Change Document section

If several documents are selected, you can switch between the documents in the header bar

The screenshot displays the XENTRY WIS interface for a Mercedes-AMG E 63 S 4MATIC+ Wagon. The left sidebar contains navigation options: Select vehicle, WIS (selected), MSS, NAV_PLUS, WSM, Bookmarks, and XSF. The main content area shows a document section with a dropdown menu set to 'Select'. Below this, a table lists document details:

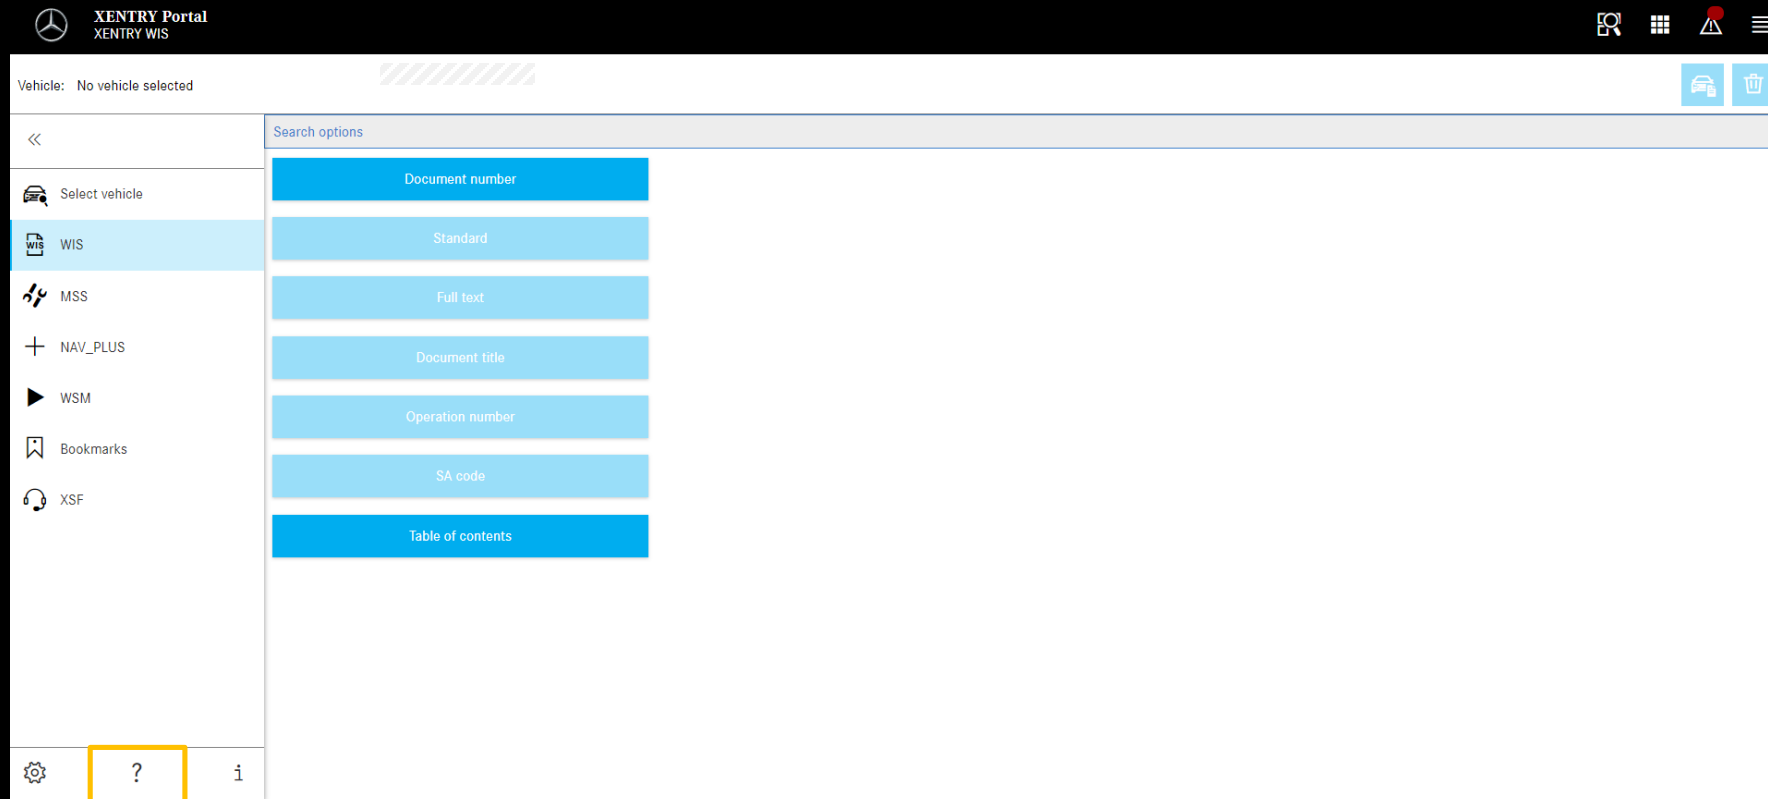

AR00.60-P-1002LWG	Lift/lower vehicle	12.10.2016
-------------------	--------------------	------------

Below the table, a list of model numbers is shown:

- Model 205
- Model 213
- Model 238
- Model 253

At the bottom, a technical diagram of the vehicle's chassis is visible, showing the suspension and engine components. The interface includes a top navigation bar with 'Search options', 'Standard', 'Hit list', and 'Display' tabs, and a right sidebar with 'Hit list' and other utility icons.

UseCase XENTRY WIS

For more information, use the "Help" available in the application as well as the content area of "XENTRY WIS" in the XENTRY Portal
